

# “C.I. Puppet Friends SILLY SHARING GAME”

## Rules

---

It’s a race to the finish with a lesson in sharing! Whoever gets to the goal first wins! You might even SHARE the victory with another player! In this game you’ll learn that things are better when we share!

### HOW TO PLAY:

#### MOVE SPINNER:

Spin the MOVE SPINNER to progress. Whichever number the point of the arrow stops at, that is how many spaces you move on your turn.

**If you land on the same space another player is on, you will both share your next turn!** For Example: If Landon lands on the same space as Milly, they will share the number of moves on Milly’s turn, and they will both move that many spaces. If you land on a SILLY CARD space you will both draw a SILLY CARD. If you both land on a SHARE BRIDGE space, you can both cross the SHARE BRIDGE. Your next turns will then be separate until you land on the same space as another player (or the same player they’ve shared with before) again.

## SILLY CARDS:

SILLY is here to mix things up! If you land on a space with SILLY'S FACE on it, you draw a SILLY CARD! Each SILLY CARD will have a random event written on it to mix the game up! Afterwards, just put the silly card at the bottom of the stack. **Remember to shuffle them at the start of the game!**

## SHARE SPINNER:

Sometimes you may get a SILLY CARD that says you have to share with another player. You will then spin the SHARE SPINNER to see who you are going to share with. If the SILLY CARD says to advance using the MOVE SPINNER and SHARE your number of moves with another player, you will spin the share spinner and the move spinner to see who you're going to share with, and how many spaces you two will move. No matter where you are on the board you both will then move that many spaces.

If the SILLY CARD says for you to share your space with another player, you will spin the SHARE SPINNER and whoever the point of the arrow lands on will then move to your space, no matter where on the board the players are at.

SHARE BRIDGES: SHARE BRIDGES are shortcuts! If you land on a SHARE BRIDGE SPACE, these can help

you advance quickly! **HOWEVER, you can only cross a share bridge if you have someone to share it with.** You can share the bridge with another player that is either one space behind you or one space ahead of you. Once you and another player cross you will both stop at the first space across the bridge (If there are two players both one space ahead or behind you, use the SHARE SPINNER to determine who you will share the bridge with. If there are no players one space ahead or one space behind you, simply move on). After crossing the share bridge the player can continue his or her turn.

HAVE FUN!
